Shopping Malls

Axi Reach understands the different market trends. On a daily average millions people work on the road and add to that consumers, students and retail workers and you can easily see that a huge market potential exists for Travelers With Laptops! With Axi Reach, we can make your internet access act as a net to reach out and catch passing potential customers. Shoppers who make a brief stop to check the Internet enter in the stores and purchase while they're "in the neighborhood." Shoppers can find out in real time the promotions and deals offered by the various tenants in the shopping mall.

In addition to the stores, the different coffee shops and cafes inside the mall will have a great need to offer internet to its many customers. The Axi Reach technology will help make advertising easier as the shopping mall can help push advertisements to the various tenants. And the tenants themselves will have a need for personal internet access as well. With the Axi Reach SMP, the mall will have the ability to charge internet access, monitor usage, and control billing. Axi Reach can provide a viable new revenue resource for your business that will prove to be beneficial for all those involved.
